on the road stay alive together

Brussels, Wednesday 2 March 2011

Dear Sir, dear Madam,

On behalf of the Consortium of the European Research Project Road Safety for motorcycles (ROsa SAfety) co-funded by Directorate General for Mobility and Transport, we would like to thank you for attending the presentation of the Project to the European Parliament.

The ROSA consortium, constituted by the *Spanish Motorcyclist Royal Federation (RFME)*, the company responsible for the organisation of the World MotoGP Championship *DORNA Sport S.L.*, the *European Union Road Federation (ERF)*, the *Portuguese Motorcyclist Federation (FMP)*, the *Coordinamento Motociclisti (CM)*, the *Asociación Mutua Motera (AMM)* and *CIDAUT Foundation*, has developed an innovative '**European Handbook on Best Practices in Safety for Motorcyclists**', providing new ideas to improve safety for PTWs riders in line with the Road Safety Programme Orientations 2011-2020.

After several months of compilations, research and analysis of good practices on road safety for motorcyclists, the Handbook will be presented to the EU Institutions and key stakeholders in the motorcycle sector promising to provide innovative solutions to improve road safety. The Handbook has been developed taking into account different inputs:

- Existing good practices improving safety for motorcyclists
- Information, ideas, experiences and technical knowledge from road safety experts gathered in different workshops within the EU during the 2010 MotoGP World Championship
- Opinions and suggestions from users (almost 2,000 opinions from riders, collected during all the European MotoGP races in 2010)

The conference will be structured in two different parts bringing together different panellists who will present ideas to reduce the number of fatalities for motorcyclists. Please note the Handbook will be online in coming weeks ready to be downloaded from the ROSA website: www.rosaproject.eu

If you would like to be notified, feel free to send us an email: aqumol@cidaut.es

Yours sincerely,

ROSA Consortium

1.- ROSA Project:

To present ROSA Project to the EU institutions and key stakeholders (users, manufacturers, administrations,...) in the motorcycle sector.

2.- ROSA and the professional PTW's world:

To bring together the professional PTW's world (through the own professional pilots and federations) to the common users before the official starting of the different World Championship.

3.- ROSA results:

- .- To explain working methodology of ROSA project.
- .- To detail how the results have been classified.
- .- To define where to find the results of ROSA (Good practices) in the following weeks.
