

We invite schools, colleges, universities and rider associations across Europe to participate in a competition to develop solutions for tampering on L-category vehicles

€500 first prize

€300 second prize, €200 third prize

Which vehicles are included? All L-category vehicles – these are mainly 'light', 'powered', two, three or four-wheeled vehicles ranging from powered cycles, mopeds and motorcycles, but also include tricycles, on-road quads and mini-cars.

What is the purpose of the competition? Some alterations to the propulsion (engine and driveline), but also to the noise abatement system of the vehicle, may have adverse effects on safety and/or the environment. The aim of the competition is to identify effective solutions to these tampering events to protect the environment and the safety of road users, including the riders and passengers of the vehicle.

What are you looking for? To challenge students and technically-minded members of the public to demonstrate solutions which would reduce or prevent tampering on the engine, transmission or exhaust of any L-category vehicle.

What is required to enter? Visit <http://l-cat.trl.co.uk> for further information and to enter the competition. The deadline for entries is the 10th June 2011.
